

TRAINING PORTAL · USER GUIDE

CEO Guide

Everything your account can see and do inside the Training Portal — the platform your organization uses to run consultant training, track post-training placement readiness, and manage every role in the company.

Prepared for the CEO account tier · Confidential — internal use only

GETTING ORIENTED

How the portal is organized

As CEO, your account sits at the top of the organization and has unrestricted access to every part of the portal — every user, every location, every report, and every configuration option. Nothing in the system is scoped away from you.

Below the CEO, the portal manages two separate groups of people:

- **The location side of the business** — Location Manager, then Location Admin, then Coordinator, then Consultant. Each of these manages the tier directly below it, scoped to one business location.
- **The offshore placement side of the business** — Offshore Manager, then Offshore Team Lead, alongside a Trainer and an Otter Team reviewer who each independently sign off on a consultant's readiness before that consultant is marked "In Marketing."

You are the only account that can see across both sides at once, create any role, and reassign anyone.

Rule of thumb: if a screen has a role picker, location picker, or "all locations/offices" option anywhere in the portal, it's because your account is the one it was built for.

SECTION 1

Your Dashboard

Dashboard is your home screen and the org-wide reporting view. It shows, across every location and every consultant in the company:

- Total, active, deactivated, and deleted (archived) consultant counts
- Breakdowns of consultants by training path, by coordinator, and by location
- Average completion percentage by training path and by coordinator
- A filterable table of every consultant, with location, coordinator, training path, extra courses, progress, last activity, and status

Use the filter bar (Location, Coordinator, Training path, Status) to narrow the table, then click **Export** to jump straight to a filtered report download.

Dashboard — org-wide stat tiles, breakdowns, filters, and the full consultant table.

SECTION 2

Locations

Locations are your company's business units or branches. **Only your account can create or archive a location** — no other role in the portal has this ability. Every user tied to the location hierarchy (Location Manager, Location Admin, Coordinator, Consultant) is scoped to one of these locations.

To do this	Steps
Add a new location	Locations → enter a Name and a short Code → Add location.
Retire a location	Locations → find the row → Archive. Archiving does not delete the users assigned to it.

Locations — create new business units, see user counts, and archive retired ones.

SECTION 3

User Management

User Management is the single, searchable list of every user in the company, across all nine roles. As CEO you can filter by any role, search by name/username/location/coordinator/manager, and act on any row: edit username, reset password, deactivate/reactivate, or delete (soft delete — the record is kept for audit history, not destroyed).

Guide LocAdmin	e2e-guide-la	Location Admin	Guide Demo HQ	Guide LocMgr	Active	Edit username	Reset password	Deactivate	Delete

User Management — every role, filterable and searchable, with row-level actions.

Bulk Reassignment: from the same page, use the "Bulk Reassignment" button to move a batch of consultants to a different coordinator in one action — useful when a coordinator leaves or a team is restructured.

SECTION 4

Creating a User

You are the only role that can create every account type in the system — Location Manager, Location Admin, Coordinator, Consultant, Offshore Manager, Trainer, and Otter Team. Pick the account type first; the form adjusts to show only the fields relevant to that role (for example, a location picker for location-hierarchy roles, an offshore office picker for offshore roles, or technology/visa/date-of-birth fields for a Consultant).

Create User — the account-type picker changes which fields appear below it.

SECTION 5

Training Paths

A training path is an ordered set of courses assigned to a consultant as their primary curriculum. Training paths are shared/global — not tied to a single location — so the same path can be reused everywhere. From here you can create, rename, archive, delete, and manage which courses belong to a path and in what order.

NAME	DESCRIPTION	STATUS	
Guide Demo Training Path	Sample path used for user-guide screenshots.	Active	Manage courses (1) Edit Archive Delete
SQL		Active	Manage courses (0) Edit Archive Delete

Training Paths — the top level of the training catalog.

SECTION 6

Courses

Courses are reusable modules made of videos. The same course can be attached to multiple training paths, or assigned to an individual consultant as a one-off "extra course" outside their primary path.

Onboarding Essentials		Active	Manage videos (0) Edit Archive Delete

Courses — reusable building blocks; "Manage videos" attaches/reorders the videos inside a course.

SECTION 7

Videos

Videos are embedded from Google Drive. Paste a Drive share link and the portal generates the embeddable preview automatically — you don't need to touch Drive's sharing/embed settings yourself. A video can be reused across multiple courses.

Videos — the base layer of the catalog, sourced from Google Drive links.

SECTION 8

Exporting Reports

Export the same consultant data shown on your Dashboard as a CSV or XLSX file, using the same filter set (location, coordinator, training path, status). Every export you run is logged automatically.

Exports — download a filtered consultant report in CSV or XLSX.

SECTION 9

Offshore Consultant Data

This page is your read-through into the offshore placement side of the business. Pick an office, then optionally narrow to a specific Offshore Manager's book of consultants, to see full consultant detail (contact info, technology, visa type, date of birth, progress) for anyone assigned to that office. From here you can also open **Manage Team Leads** to see the Offshore Team Lead accounts working under each office.

Consultant Data — office and manager filters drill into the offshore-side roster.

Location Overview

A readiness snapshot: for a chosen office, how many consultants are still "In Training" versus already "In Marketing" — the status a consultant reaches once both an independent demo sign-off and a second review sign-off have both come back positive. As CEO you can switch between offices; every other role sees this pre-scoped to their own consultants automatically.

SECTION 11

Notifications

Your inbox for company-wide events that need your attention: a Location Manager running a report export, any password reset (self-service or admin-initiated), and any consultant deletion. This inbox is visible to your role only.

Notifications — CEO-only inbox for sensitive account and export events.

SECTION 12

Audit Logs

A complete, filterable, chronological record of every sensitive action taken anywhere in the portal — user creation, password resets, deactivations/deletions, training assignment changes, catalog edits, report exports, logins, and every readiness-verdict submission. Filter by action type or a date range. This page is visible to your role only, and nothing in it can be edited or deleted from the interface — it's a permanent record.

Why it matters: the audit log is your single source of truth if you ever need to answer "who changed this, and when."
