

TRAINING PORTAL · USER GUIDE

Offshore Manager Guide

Everything your account can see and do inside the Training Portal — reviewing your office's consultants and managing your Offshore Team Leads.

Prepared for the Offshore Manager account tier · Confidential — internal use only

GETTING ORIENTED

Your place in the structure

Your account is assigned to one office. You have full read access to every consultant in that office — name, contact info, technology, visa type, date of birth, and training progress — but you don't edit or delete consultant records directly.

Below you sits one role you do manage directly: the **Offshore Team Lead**. You can create Team Lead accounts in your office and decide which consultants each Team Lead is responsible for.

SECTION 1

Consultant Data

Your landing page: every consultant in your office, with full detail — email, phone, technology, visa type, date of birth, and status. Each row has a **Team Lead** dropdown so you can assign or reassign which of your Team Leads is responsible for that consultant, right from the table.

Location-1 — your consultants.

Name	Username	Email	Phone	Technology	Visa Type	Date of Birth	Status	Team Lead
Priya Nair	e2e-guide-c2	priya.nair.guide@example.com	555-010-2222	Java Full Stack	STEM OPT	9/3/1997	Active	Guide TeamLea ▾
Alex Rivera	e2e-guide-c1	alex.rivera.guide@example.com	555-010-1111	Java Full Stack	H1B	4/12/1995	Active	Guide TeamLea ▾

Consultant Data — your office's full consultant roster, with inline Team Lead assignment.

SECTION 2

Team Leads

Create new Offshore Team Lead accounts for your office, and manage the ones that already exist — edit username, reset password, deactivate/reactivate, or delete. The "Consultants assigned" column shows how many consultants currently report to each Team Lead.

Team Leads — create and manage Offshore Team Lead accounts in your office.

Reassignment: Team Leads aren't permanently tied to whoever created them — any Offshore Manager in the same office can reassign a Team Lead's consultants or move them between Team Leads as workloads change.
